Court, we were unable to do more than enumerate the exhibits of L. NRUFELD, of Bertin, and that enumeration was erroneous. Since writing that notice, the Sydney agents, Messre, Rabone, Feet & Co., have given us an opportunity of seeing the instruments, of which four are exhibited instead of two, as formerly stated. The Flewes is a Grand of full compass, 74 octaves overstrung, "an accustical metal frame in agrafics, the action is perfect unfailting repetition." All the modern improvements are applied: the instrument is cased in wainut, of sue tone and light touch, and being in addition by far the most price worthy ought to command the most ready market.

No. 2 is an upriphi cottage grand, with iron frame overstrung, well finished, and cased in a handsome frame in the Louis Quaitorus style. Be-3 is an upright cottage, simpler in the exterior, but with substantial metal frame, and all the evidences of thorough care in the internal construction. He is in overstrung upright bondoir cottage of very agreeable tone.

Having thoroughly examined the wavenuments and construction, and tested tone and touch we are able to speak with confidence on the sterling morius of these instruments, especially when we compare the places with these of other artibits.
